Synopsis: Technical Architect with 4+ years in Architectural leadership and 18+ Year of experience in designing and developing high performance software system for BFSI, Payment Gateway, Health and Retail.

EXPERIENCE SUMMARY

- Deep expertise in Microservices and cloud native architecture across web desktop and open API Environment.
- Leading cross functional teams of up to 20 members through Agile Transformations, Process Optimization and cloud first strategies.
- Expertise in designing and developing applications using Object-Oriented Methodology.
- Experience in leveraging AI-Powered Developer tools such as Microsoft Copilot and GitHub Copilot to accelerate software delivery, enhancing code quality, automat coding tasks.
- Passionate about integrating GEN AI into modern development workflows.
- Collaborate with stakeholders to translate business requirements into robust technical solutions.
- Strong experience in developing RESTful web services and microservices using Spring Boot and Java, with Spring Data JPA, Spring Cloud, Spring Security, Apache Kafka.
- Well-versed in the Software Development Life Cycle (SDLC) and Agile methodologies.
- Familiar with Docker/Kubernetes environment and CI/CD with Jenkins and GitHub Actions.
- Experience in writing optimized SQL queries and integrating with relational databases like MySQL and Oracle using Spring Data JPA.
- Skilled in designing, implementing, and executing unit and integration tests using JUnit and Mockito, as well as Postman and Swagger UI.
- Experience in bug tracking and defect lifecycle management using tools like SonarQube, and JIRA.
- Participated in high level design, code architecture, Test Driven Development (TDD), Testing, Deployment, Monitoring.
- Good Understanding in Spring – (Boot, Security, Cloud), Java Design Patterns, SonarQube, Agile methodology, JIRA, GitHub, SOLID Principles, Python, AI/ML (LLM, RAG) - Agentic AI.

Areas of Experience

Industries

Finance (BFSI), Payment Gateway, Retail, Health

Applications
→ Tech Master (Ricoh)
→ Global Repository Portal – CME Group
→ Fleetcor Payment Credit – (Corpay) Fleetcor

Primary Skill
Java 8,17, J2ee, Microservices, Spring boot, Kafka, JPA.

Second Skill
Angular, Python, Redis.

Cloud
AWS (Lambda, S3, RDS, CloudWatch)

AI
AI/ML (LLM, RAG, Llama Index), Agentic AI

RDBMS
PostgreSQL, MySQL,Oracle

Operating Systems
Windows 10/11, Linux

Source Safe Tools
→ GitHub

QUALIFICATION

Degree: MCA
Institute: Information Technology Management (Gwalior M.P.)
Year: 2005

CERTIFICATION

GEN AI Technical Architect (2025)
Hexavarsity (Sonic)

Rampratap Singh Kushwah

+91-9860676386 rpratap30@gmail.com India

Working with Hexaware Technologies Ltd. From Jan 2022 – Till date

PROJECT EXPERIENCE

Project Name	**: Tech Master (Ricoh)**
Role	**: Technical Architect at Hexaware Technologies**
Environment	**:** Microservices, JAVA 17, Spring (Boot 3.0, Security, Data, Cloud), SAML(SSO), JPA, RDS, Docker, GitHub, Mockito-Junit, PL/SQL, SonarQube, AWS tech stack-(Lambda, S3 Bucket, CloudWatch), Angular 16.
Duration	**:** Aug 2024 – Till date
Tools Used	**:** GitHub Actions, AWS, SonarQube, Postman, Docker, Kubernetes

Description:
Tech Master provides a new enterprise application to replace the legacy. Tech Master Access-based database application, to provide coverage for existing features and more using contemporary technology, Ability to associate technicians with operational managers, which may differ from the HR system due to managers being sick (need temporary change flag/date) /On leave, or alignment to field managers that are closer to the work being performed. Ability for Admins to view, edit and approve final changes.

Responsibilities:
- Requirement Understanding from Client (AN-100).
- Provide Estimation for Project timeline (DS-140).
- Design and Developed **REST API** and server-side validation as per requirement and implemented case management modules with new requirements and modified existing components
- Define API contracts, scalability patterns, cloud deployment models, and security standards
- Deployment on DEV, UAT, and Production environments.
- Executed solutions for changing security vulnerabilities.
- Guide development teams define best practices, review designs, and provide technical support.

Project Name	**: Global Repository Portal – (GRP) CME Group**
Role	**: Technical Architect at Hexaware Technologies**
Environment	: Microservices, JAVA 17, Spring (Boot 3.0, Security, Data, Cloud), JPA, RDS, Docker, GitHub, and AWS tech stack-(Lambda, S3 Bucket, CloudWatch), Mockito-Junit, SonarQube, Postman, Swagger UI, Angular 16
Duration	**:** Jan 2023 – July 2024

Description:
CME Group (Chicago Mercantile Exchange) is focused on delivering new ways to manage risk and improve performance. Whether it's a new futures contract for the evolving cryptocurrency market, tracking emerging benchmarks like CME SOFR Term Reference Rate or back testing alternative data sets, new opportunities are always waiting our market participants.

Roles and Responsibilities:
- Requirement Understanding from Client (AN-70).
- Requirement gathering and analysis of functional specifications.
- Implementation of the stories and tasks of the current sprint designed by 'Product Owner' mainly in the JIRA.
- Design and Developed **REST API** and server-side validation as per requirement and implemented case management modules with new requirements and modified existing components.
- Deployment on DEV, QA, UAT, and Production environments with Jenkins.
- Code Review and Testing

Project Name	**: Fleetcor Payment Credit – (Corpay) Fleetcor**
Role	**: Technical Architect at Hexaware Technologies**
Environment	**:** Microservices, JAVA 8, Spring (Boot 2.0, Security, Data, Cloud), JPA, DB2, Docker, GitLab, Bitbucket, and SVN, AWS tech stack-(Lambda, S3 Bucket, CloudWatch), Splunk, Mockito-JUnit, DB2, Angular 16
Duration	**:** Jan 2022 – Dec 2022

Description:
Corpay help business modernizes how they track manage and pay their expenses. and helps small businesses thrive with a better business bill pay platform, complete with effortless bookkeeping, expense management, and more.

Roles and Responsibilities:

- Requirement Understanding from Client.
- Requirement gathering and analysis of functional specifications.
- Work Allocation with story design on confluence, and tracking.
- Design and Developed **REST API** and server-side validation as per requirement and implemented case management modules with new requirements and modified existing components.
- Deployment on DEV, QA, UAT and Production environments with Jenkins.
- Code Review and Testing.
- Bug Resolution.

PREVIOUS WORK EXPERIENCE

Worked with Intuit Inc. From Mar 2021 till Dec 2021

Project Name	**: TurboTax Intuit Inc**.
Role	**: Sr. Principal Engineer**
Environment	**:** Microservices, JAVA 8, Spring (Boot 2.0, Security, Data, Cloud), JPA, MySQL8.0, Docker, GitHub, AWS tech stack-(Lambda, S3 Bucket), Splunk
Duration	**:** Mar 2021 – Dec 2021

Description:
TurboTax is a software package for preparation of American income tax returns, produced by Intuit. This software is designed to guide users through their tax returns step-by-step. The TurboTax software provides taxpayers additional support for their self-prepared returns by offering Audit Defence from Tax Resources, Inc.

Roles and Responsibilities:

- Requirement Understanding from Client.
- Requirement gathering and analysis of functional specifications.
- Work Allocation with story design on confluence, tracking, and Lead Daily Sprint Meeting.
- Developed and implemented case management modules with new requirements and modified existing components.
- Designed and implemented project architecture.
- Deployment on DEV, QA, UAT and Production environments with Jenkins
- Code Review and Testing, Bug Resolution.

Worked with Talentployer Pvt. Ltd. From Aug 2020 till Feb 2021

Project Name	**:Global Enterprise Messaging and Services - (GEMS). Broadridge Financial Solutions**
Role	**: Lead Consultant**
Environment	**:** Microservices, JAVA 8, Spring (Boot 2.0, Security, Data, Cloud), JPA, MySQL8.0, Docker, GitHub, AWS tech stack-(Lambda, S3 Bucket, CloudWatch), Splunk
Duration	**:** Aug 2020 – Feb 2021

Description:
Global Enterprise messaging and services - Gems is a standard-based generic re-usable integration solution which support integration protocols and messages format which are most used across Broadridge systems

Roles and Responsibilities:

- Requirement Understanding from Client.
- Work Allocation with story design on confluence, tracking and Lead Daily Sprint Meeting.
- Design and Developed **REST API** and server-side validation as per requirement and implemented case management modules with new requirements and modified existing components.
- Designed and implemented project architecture.
- Requirement gathering and analysis of functional specifications.
- Code Review and Testing, Bug Resolution.

Worked with Miraya Wealth Advisors Pvt. Ltd. From Feb 2020 till Aug 2020

Project Name	**: IAMIN (Product)**
Role	**: Sr. Principal Engineer**
Environment	**:** Microservices, JAVA 8, Spring-Boot, Oauth2, JPA, PostgreSQL, PL/SQL, Docker, JUnit, AWS tech stack-(S3 Bucket, CloudWatch), Liquibase, Swagger UI, GitHub, SonarQube, Postman.
Duration	**:** Feb 2020 – Aug 2020

Description:
IAMIN is the only thing you need to manage your child's finances and teach him or her about saving and spending money, create goal and achieve that goal for Parent and child vice-a-versa. Worked with Infinx Services Pvt. Ltd. From Sept. 2018 till Jan 2020

Project Name	**: Infinx Patient Access (Product)**
Role	**: Principal Engineer**
Environment	**:**Microservices, JAVA8, Spring-Boot, JWT-Token, JPA, PostgreSQL, PL/SQL, Docker, Jolt –Transforming (JSON), JUnit, Bitbucket, Swagger2, AWS tech stack-(S3 Bucket, CloudWatch), Liquibase, SonarQube.
Duration	**:** Sept 2018 – Jan 2020

Description:
See patients faster with prior authorization technology with automated insurance eligibility and patient co-pay estimation features. It's Patient Access Solutions. Our Prior Authorization Software leverages and automation, with exception handled by our certified specialists to preserve and increase revenue by streamlining the prior authorization process.

Roles and Responsibilities:
- Requirement Understanding from Client.
- Work Allocation with story design on confluence and Lead Daily Sprint Meeting
- Participate in new requirements with business team and discussed the issues.
- Designed goals and completed problem-solving of product development issues.
- Developed and two Microservice individuals contributed maintained new requirements and modified existing components.
- Code Review, Testing and Bug Resolution.

Worked with Axis Bank (Tejora Pvt. Ltd.) From Jan. 2014 till Sept 2018.

Project Name	**: Supply Chain Finance Management (SCFM)**
Client	**: Axis Bank (On-Side)**
Role	**: Technical Lead**
Environment	**:** JAVA, Spring (MVC, Security, Boot), JSON, JQuery, Java-Script, SQL, PL/SQL, REST / SOAP Web Services, HTML5.
Tools Used	**:** Eclipse

Description:
The Bank provides holistic funding solutions to the supply chain of corporate. Products under this segment cater to the funding needs of supply chain members and increase operational efficiency of the entire chain. The delivery service is through a technology platform designed to increase transactional convenience for the corporate.

Responsibilities:
- Work Allocation and tracking.
- Lead Daily Stand-ups Meeting.
- Responsible for defect solution and AOPM.
- Participate in new requirements with business team and discussed the issues.
- Code Review and Testing.
- Designed goals and completed problem-solving software development issues.
- Developed and maintained new requirements and modified existing components.

.

Sr. Software Engineer
Multiple Companies (2008 – 2014) including:
- Business Intelli Solutions
- Collabera (Client: JPMorgan Chase)
- Web Element Inc.
